

CSC / Ascio

CSC Global does not always allow customers to manually add extra users to their account. In most cases this can be done by contacting support. If the domain has to be transferred, we will require an account with Full Admin rights. For redelegation, we only need the access level "Edit Zones/DNS".

Contact domainshelp@cscinfo.com to get in touch with a customer service specialist. It is strongly recommended to use the customer's CSS, as they will do everything for you.
