Console Cloud Google

Lær hvordan du indsætter dit betalingskort i din Google Cloud Konto.

- Opsætning af Billing Account

Opsætning af Billing Account

> English version below

Hvorfor skal jeg tilføje mit betalingskort?

For at kunne benytte services som f.eks. Google Maps og reCAPTCHA kræver Google, at der er tilknyttet et betalingskort til kontoen.

Google stiller hver måned en kredit til rådighed. Hver gang en af deres services anvendes, trækkes forbruget fra denne kredit.

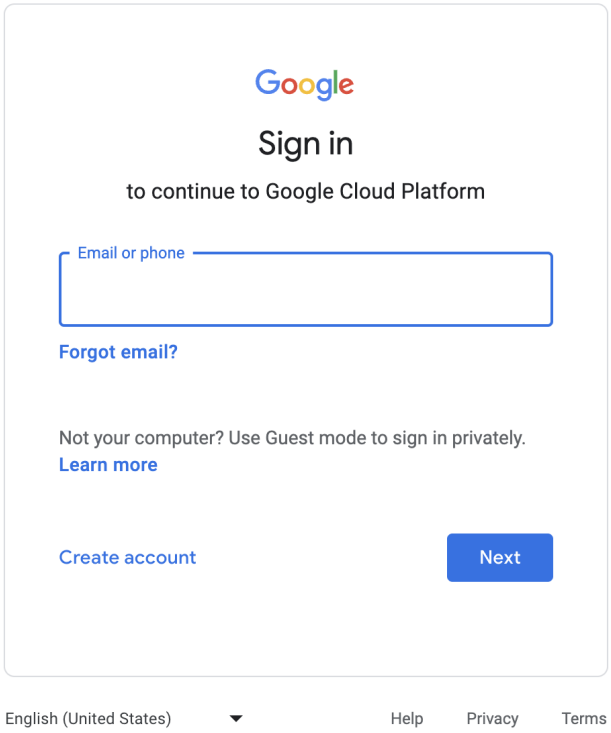

Hvis den månedlige kredit mod forventning bliver opbrugt, kan Google opkræve et mindre beløb pr. brug af servicen.

Du kan læse mere her:

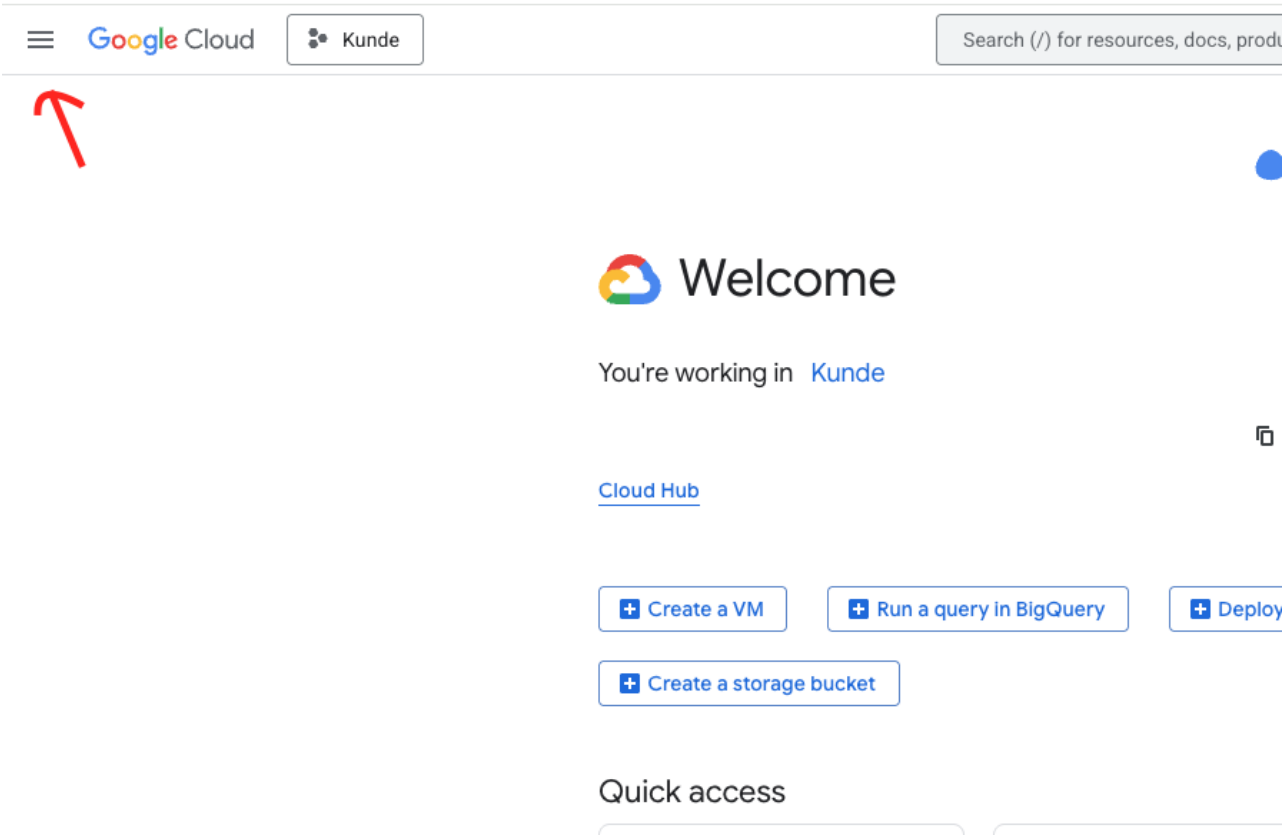

- reCAPTCHA: https://docs.cloud.google.com/recaptcha/docs/compare-tiers
- Google Maps: https://developers.google.com/maps/documentation/javascript/usage-and-billing

Sådan opretter du en "Billing Account"

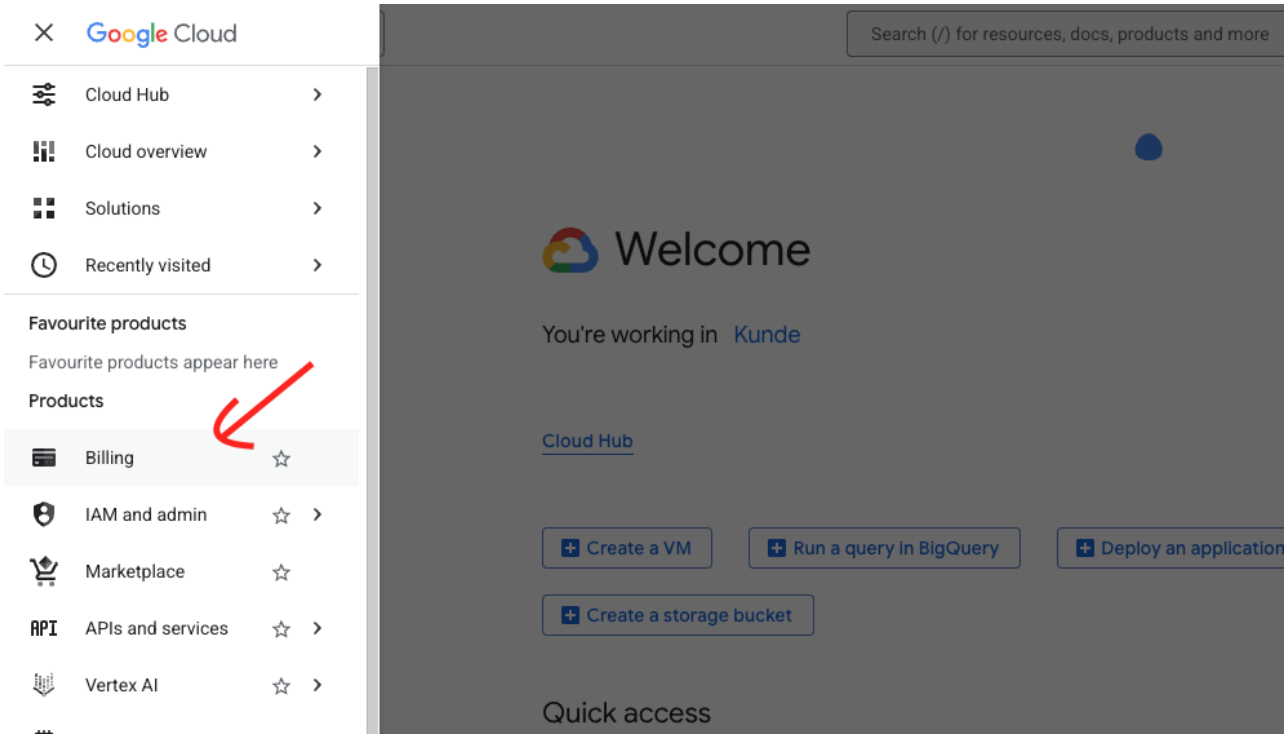

1. Først skal du logge ind i Google Cloud Console. Det gør du ved at gå til denne URL: Google Cloud Console.

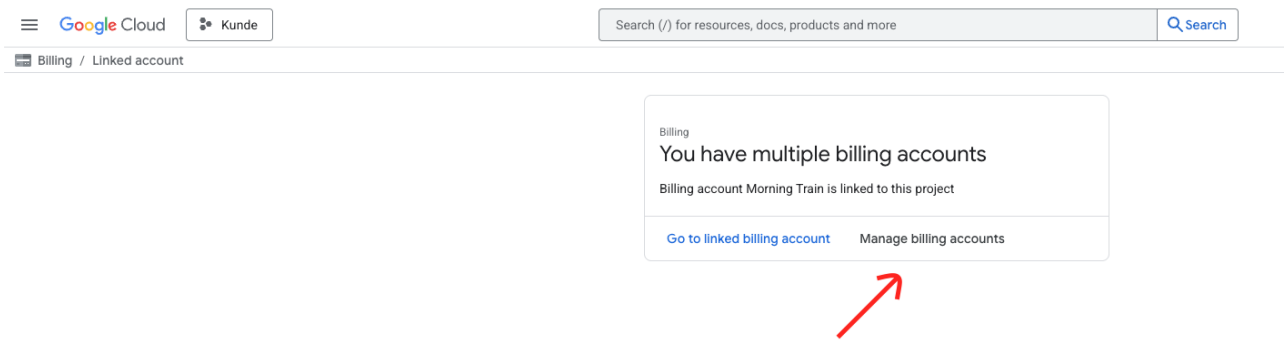

2. Klik på menuen i øverste venstre hjørne.

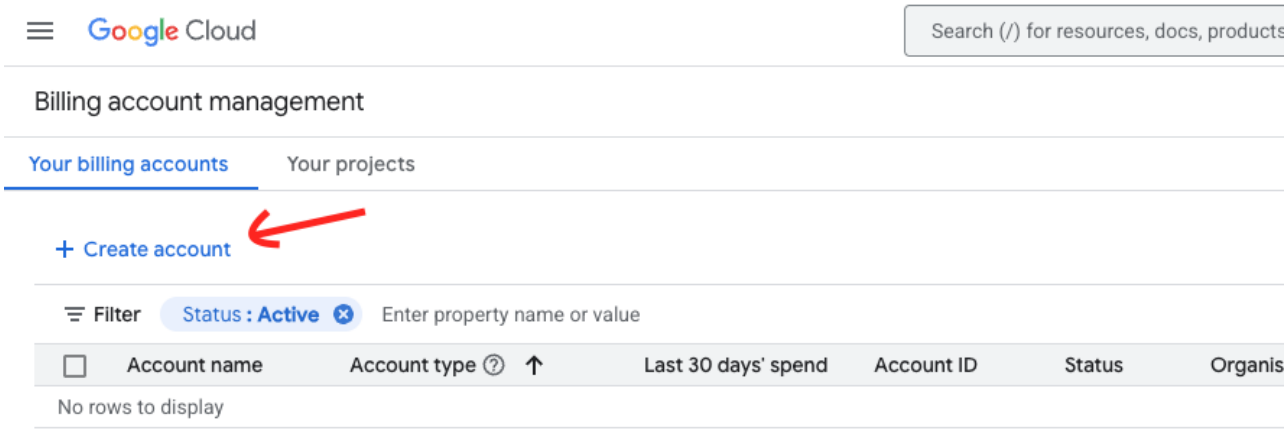

3. Klik derefter på **Billing**.

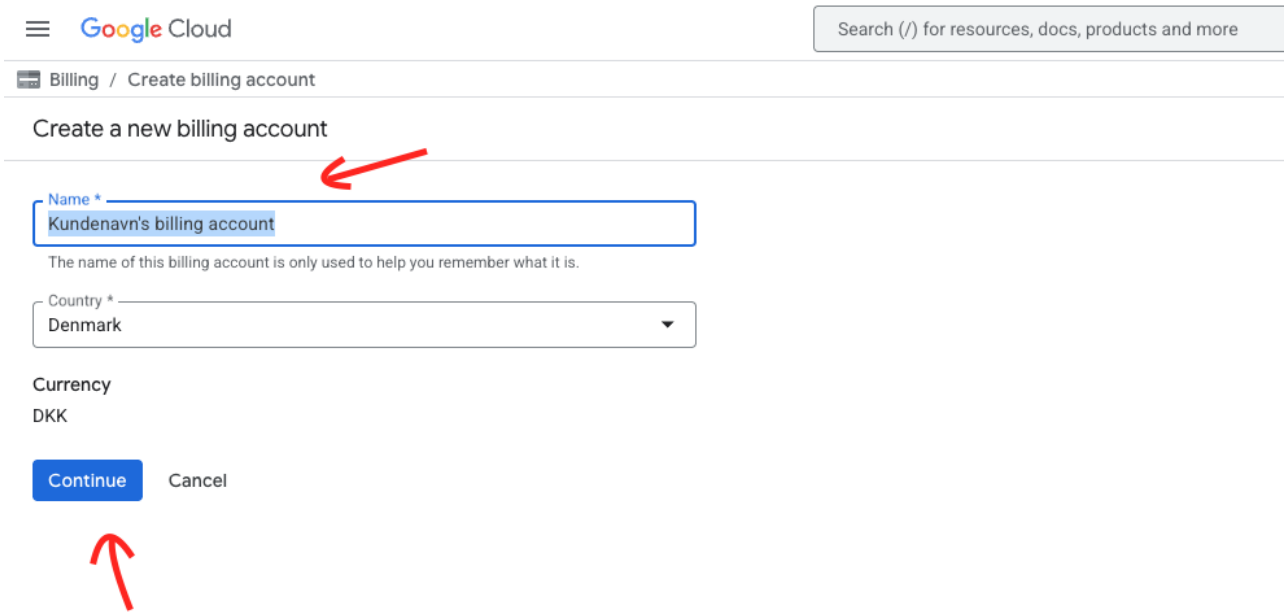

4. Hvis der allerede er tilknyttet en Billing Account til projektet, skal du klikke på **Manage billing accounts**.
   Hvis der endnu ikke er tilknyttet en Billing Account, skal du i stedet klikke på den blå knap **Create Billing Account**.

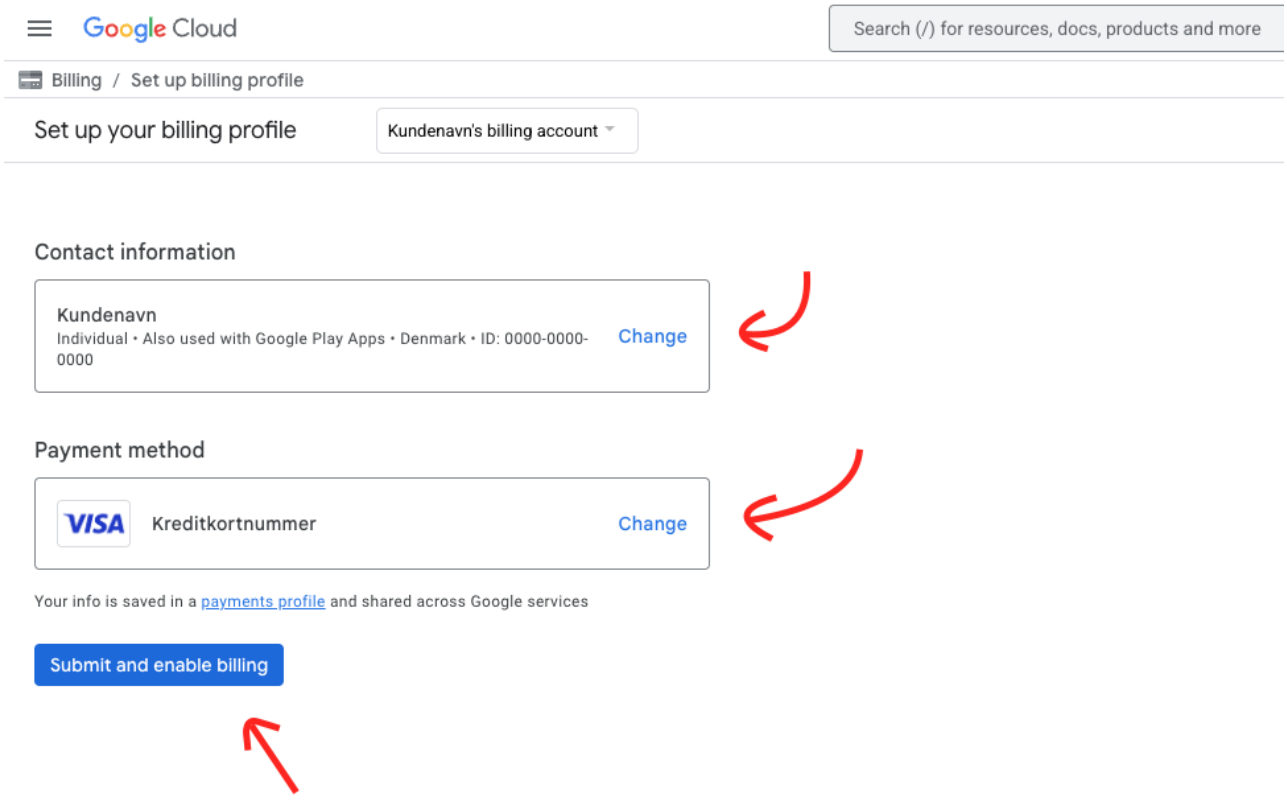

5. Klik på **Create account.**

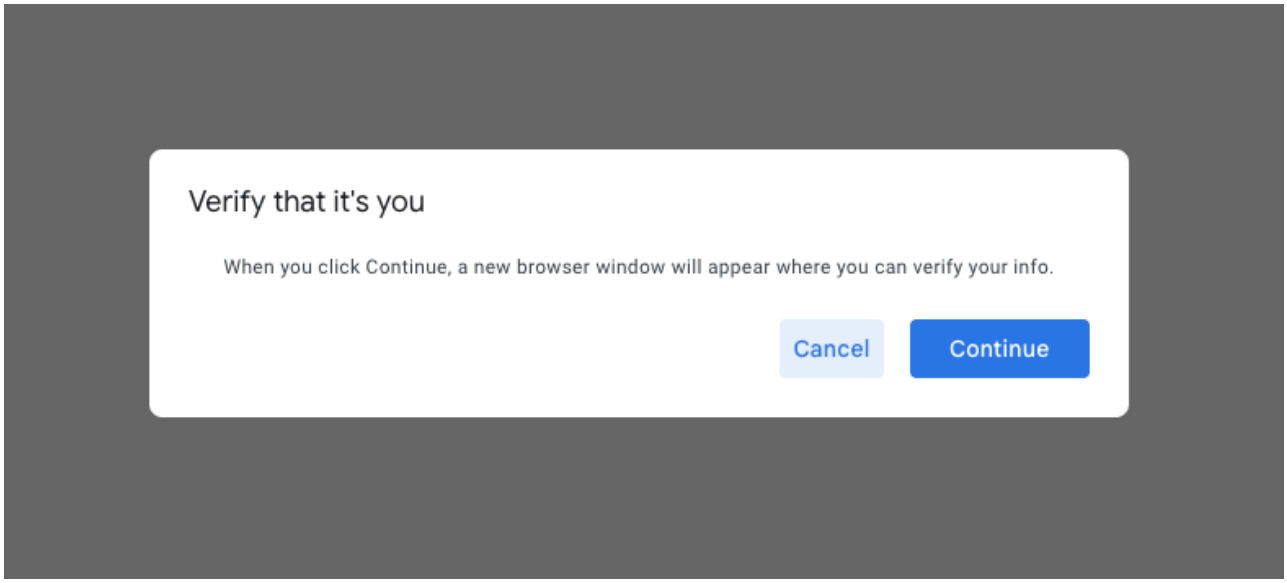

6. Giv den nye Billing Account et navn, og klik på **Continue**.
   Det er en god idé at vælge et navn, der er nemt at genkende - f.eks. navnet på jeres virksomhed.

7. Indtast nu kontaktinformationer og oplysningerne for det betalingskort, der skal tilknyttes den nye Billing Account. Klik derefter på **Submit and enable billing**.

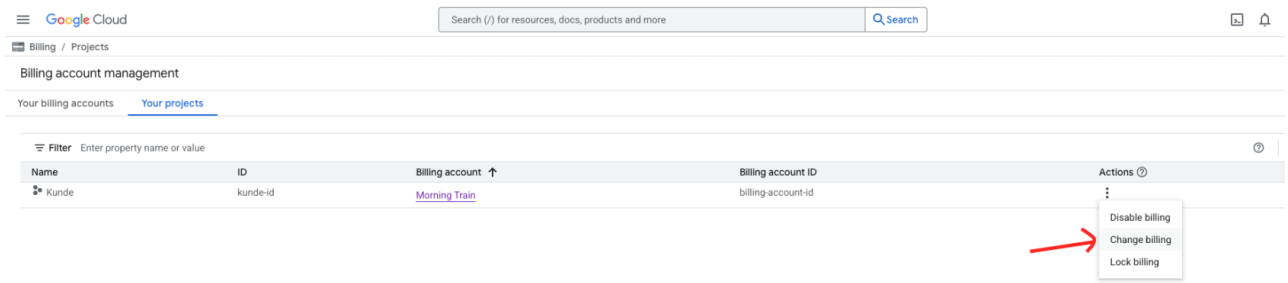

8. Bekræft, at kortet tilhører dig. Du bliver ledt videre til MitID eller en lignende godkendelsesløsning, hvor der gennemføres et testkøb på 0 kr.

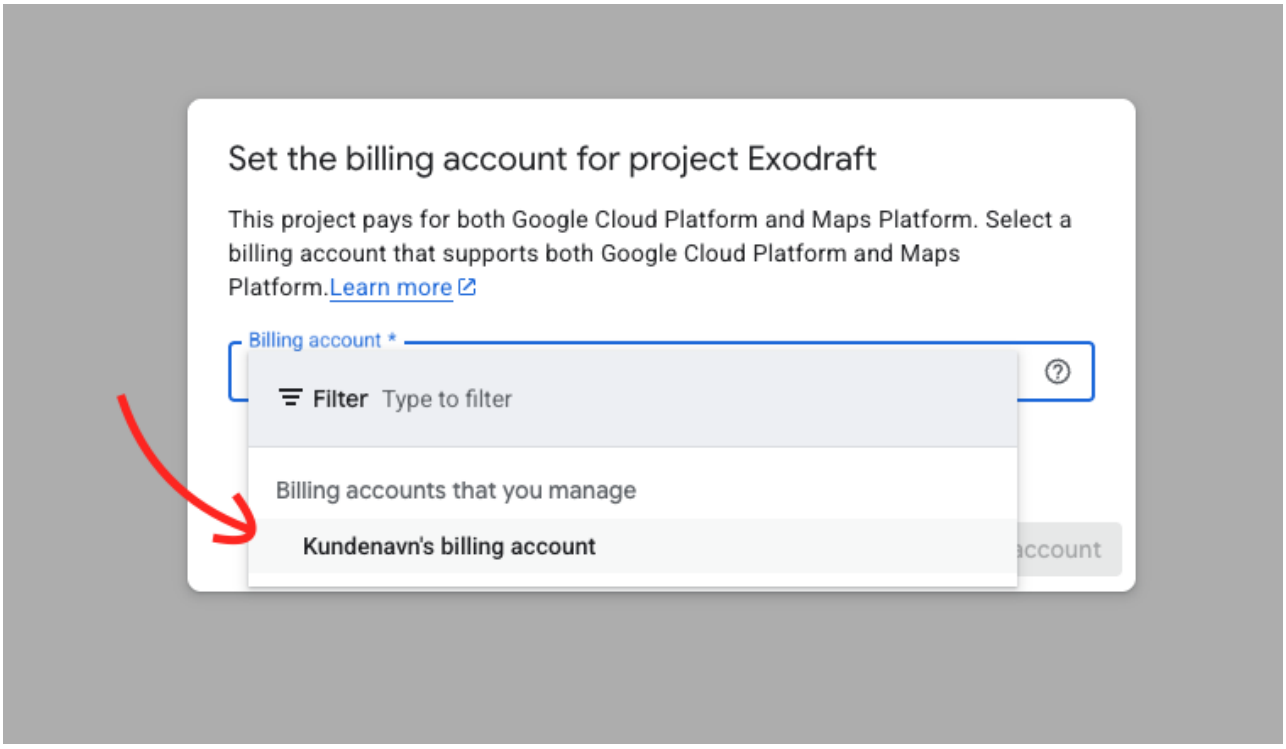

9. Din nye Billing Account er nu oprettet, men den er endnu ikke knyttet til Google Cloud-projektet.

   Gå til: Google Cloud Projekter

   Find dit projekt på listen. Klik på de tre prikker ud for projektet, og vælg derefter **Change billing**.

10. Vælg den nyligt oprettede Billing Account på listen, og klik på **Link Account.**

11. Den nye **Billing Account** er nu knyttet til projektet.

Setting up a Billing Account

Why do I need to add my payment card?

To use services such as Google Maps and reCAPTCHA, Google requires a payment card to be linked to the account.

Google provides a monthly credit. Each time one of their services is used, the usage is deducted from this credit.

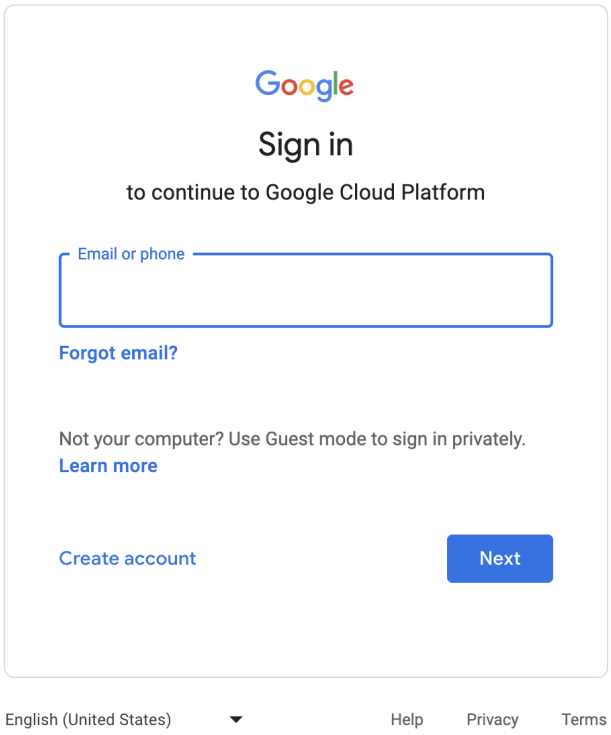

If the monthly credit is unexpectedly used up, Google may charge a small amount per use of the service.

You can read more here:

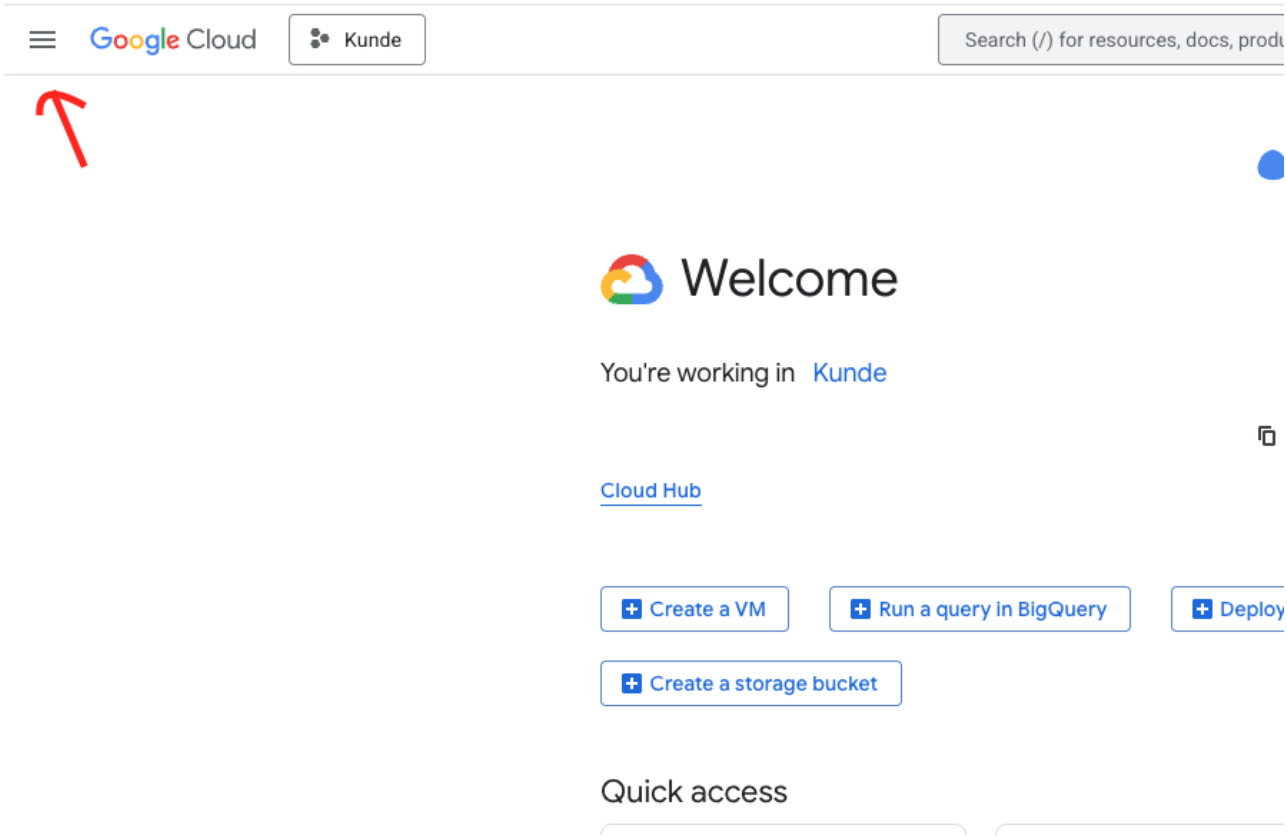

- reCAPTCHA: https://docs.cloud.google.com/recaptcha/docs/compare-tiers
- Google Maps: https://developers.google.com/maps/documentation/javascript/usage-and-billing

How to create a Billing Account

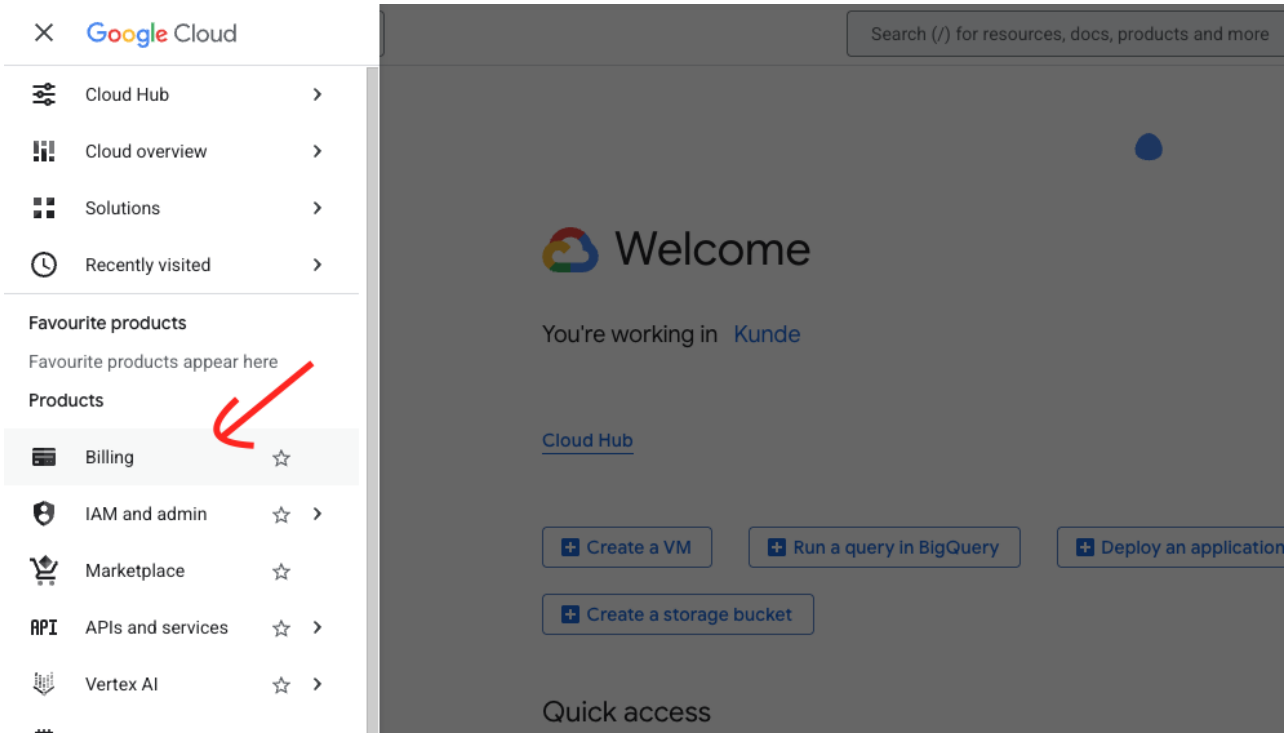

1. First, log in to Google Cloud Console. You can do this by going to this URL: Google Cloud Console.

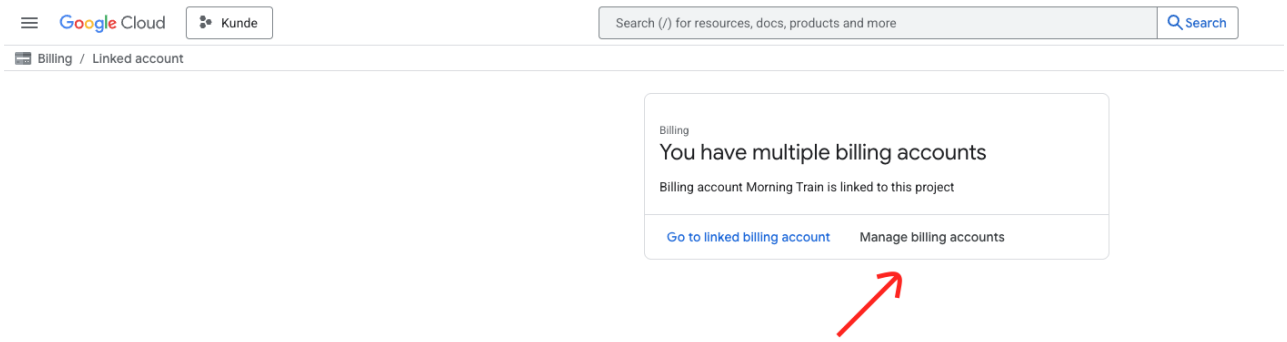

2. Click the menu in the top-left corner.

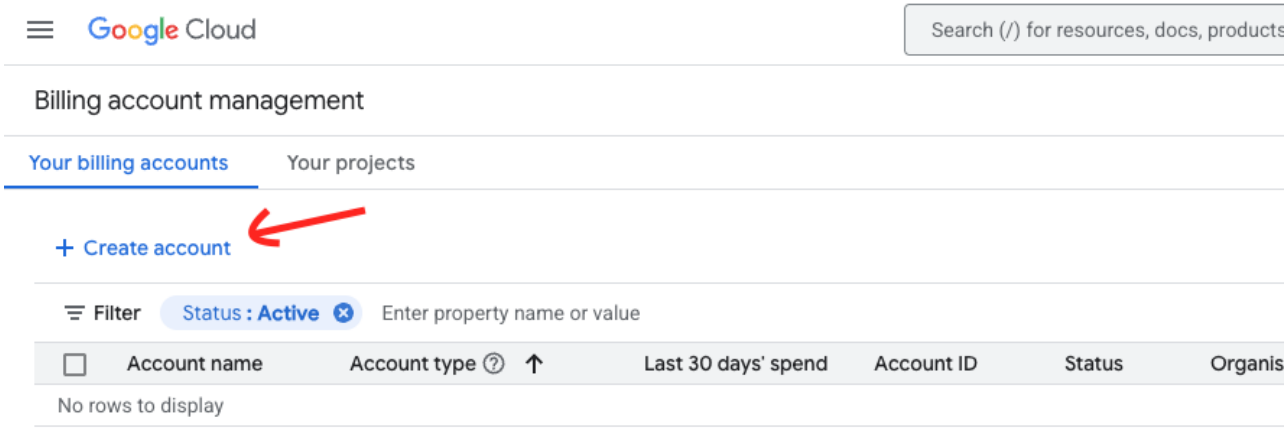

3. Click **Billing**.

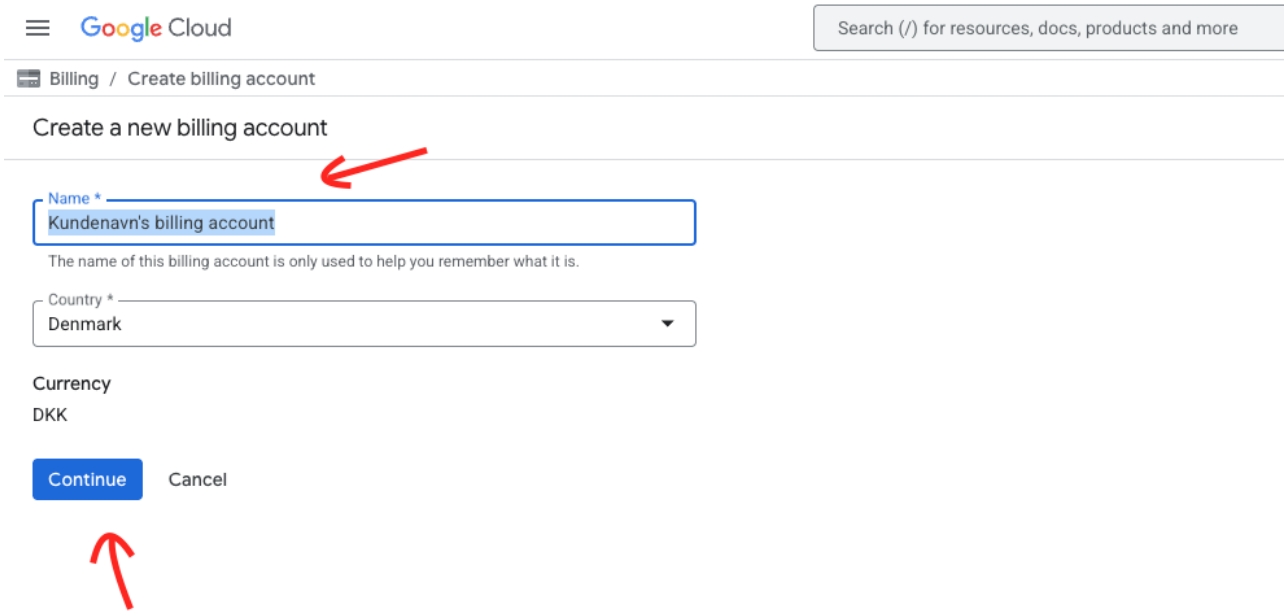

4. If a Billing Account is already linked to the project, click **Manage billing accounts**.
   If no Billing Account is linked yet, click the blue **Create Billing Account** button instead.

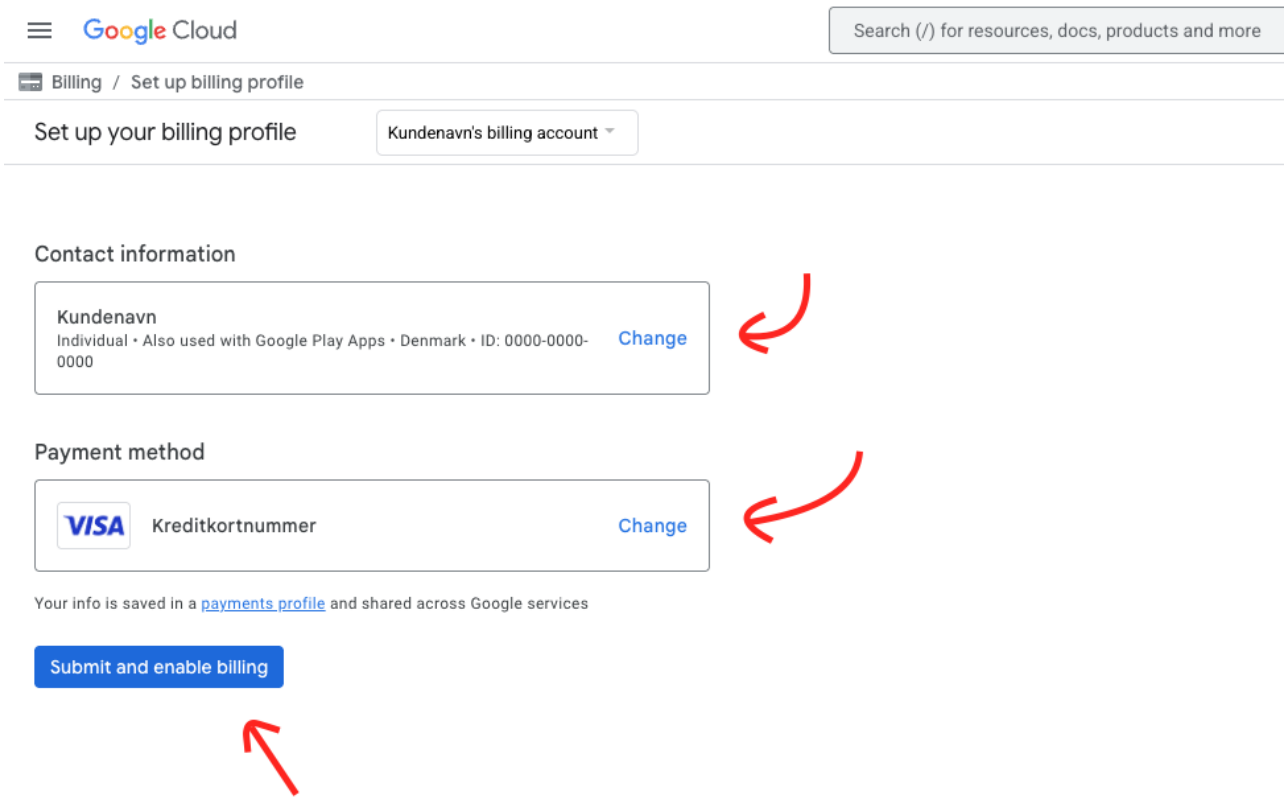

5. Click **Create account.**

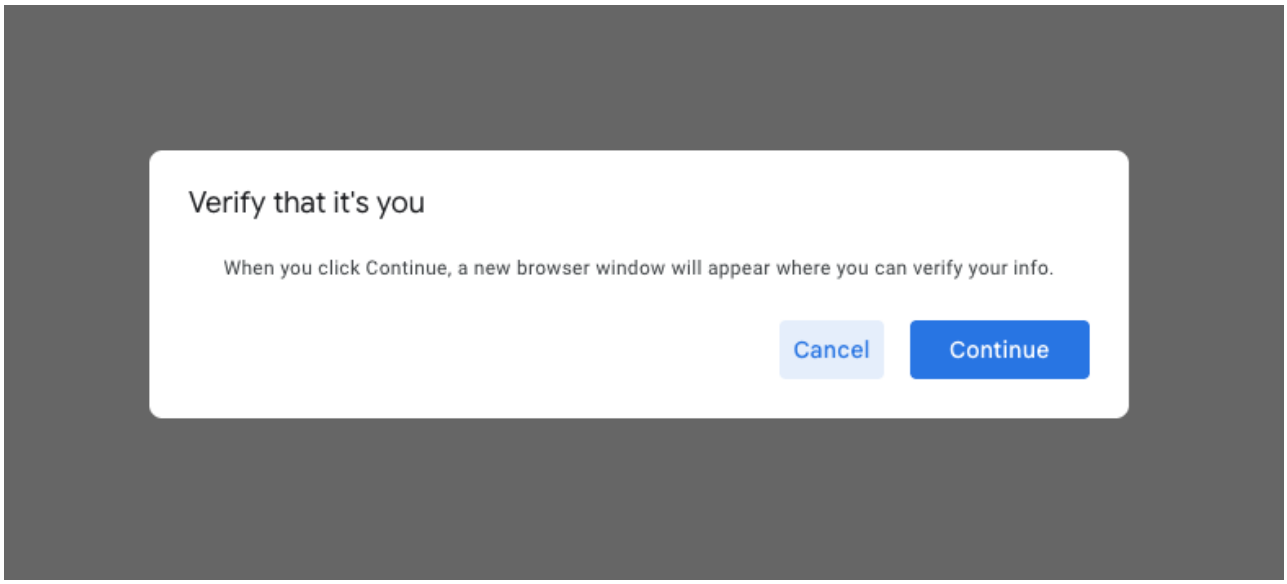

6. Give the new Billing Account a name and click **Continue**.
   It is a good idea to choose a name that is easy to recognize - for example, the name of your company.

7. Enter the contact information and the payment card details for the card that should be linked to the new Billing Account. Then click **Submit and enable billing**.

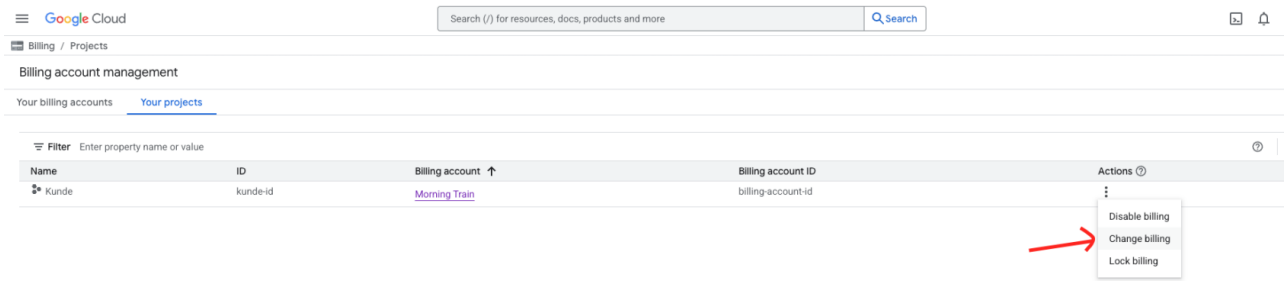

8. Confirm that the card belongs to you. You will be redirected to MitID or a similar verification service, where a test purchase of DKK 0 will be completed.

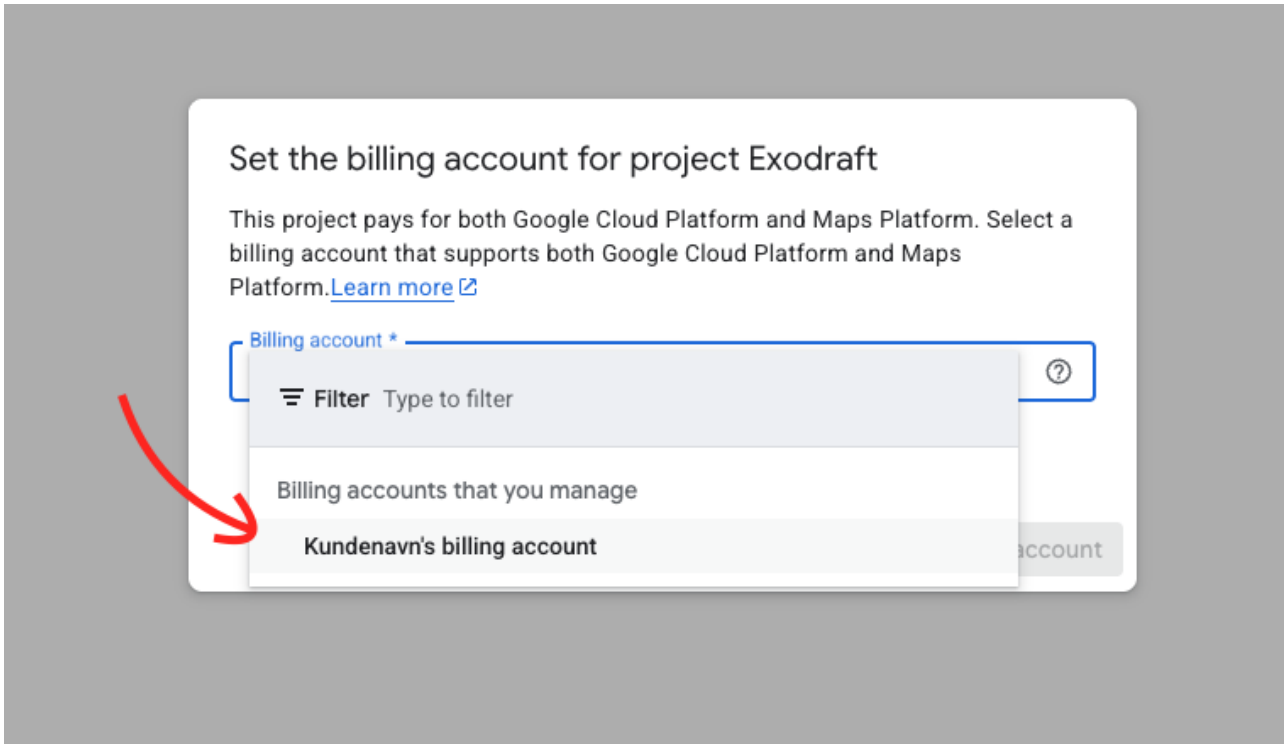

9. Your new Billing Account has now been created, but it is not yet linked to the Google Cloud project.

   Go to: [Google Cloud Projekter]

   Find your project in the list. Click the three dots next to the project, and then select **Change billing**.

10. Select the newly created Billing Account from the list, and click **Link Account.**

11. The new Billing Account is now linked to the project.
